AGUS SYAHRIL MUBAROK

SOFTWARE ENGINEER

- Central Jakarta, Indonesia
- +62 812-2245-1257
- agussyahrilmubarok@gmail.com

Software Engineer with a strong background in software development, system architecture, and cloud computing. Experienced in building and optimizing production-grade applications, with a focus on improving efficiency, scalability, and performance. I enjoy exploring new technologies and continuously learning to stay sharp in an ever-evolving industry.

WORK EXPERIENCE

Software Engineer - Hand Enterprise Solutions Indonesia
September 2024 - Present

- Joined the Operations & Maintenance team to support key UNIQLO services, including Store Offline-to-Online (O2O), Store Inventory, and the Order Management System (OMS).

Backend Engineer - MZS Software House
December 2021 - November 2023 (2 years)

- Developed, tested, and documented RESTful APIs using Golang.
- Managed relational SQL databases for backend services.
- Automated CI/CD pipelines using Docker, Kubernetes, and AWS.
- Built event-driven microservices using Apache Kafka.
- Delivered features in Agile/Scrum sprints via code reviews and daily stand-ups.

Process Engineer - PT Astra Honda Motor
December 2017 - November 2019 (2 years)

- Developed, monitored, and optimized die casting parameters to ensure product quality and process stability across high-volume production lines.
- Conducted root cause analysis for production defects and equipment downtime, implementing corrective actions to reduce cycle time, scrap rate, and energy consumption.
- Collaborated cross-functionally with maintenance, quality, and production teams to resolve operational issues and support new product development initiatives.
- Ensured compliance with safety, environmental, and quality standards while documenting SOPs, work instructions, and control plans for die casting processes.

IT Support - Axioo Class Program
September - November 2016

- Provided technical support for hardware, software, and network issues, managing IT assets, updates, and backups across the organization.
- Assisted in IT project implementations including software rollouts, network upgrades, and security deployments.

RELATED SKILLS

- **Technical Skills**
  Go, Java, TypeScript, Nextjs, RESTful APIs, Microservices, Docker, Kubernetes, AWS, Redis, Kafka, Observability Tools, PostgreSQL, Unit Testing, Networking, CI/CD.
- **Soft Skills**
  Computational Thinking, Analytical Problem-Solving, Collaboration & Team Communication, Ownership, Adaptability.

EDUCATIONAL BACKGROUND

- **Universitas Islam Al-Ihya Kuningan**, 2020 - 2024
  Bachelor of Computer Science in Informatics, GPA: 3.88
  Thesis : Development of Prototype Automatic Waste Classification System based on Robotics and Machine Learning.
- **SMK Pertiwi Kuningan**, 2014 - 2017
  Computer and Network Engineering
  Final Project : IoT-based Smart School System Design and Implementation.

COURSE AND CERTIFICATION

- **Mobile Development (Android)** - Bangkit Academy, Feb - Jul 2024
  Kotlin, Android SDK, and AI integration for mobile applications.
- **Backend Developer (NodeJS)** - Dicoding Indonesia, Jan - Sep 2023
  Node.js, RESTful APIs, Microservices, Hapi.js, and Express.js.
- **Scalable Web Service (Go)** - Digital Talent KomInfo, Feb - Jun 2022
  Go concurrency, performance optimization, and high-traffic web services.
